## 🔍 Objective:

An enthusiastic test engineer who is a self-starter and capable to use software testing skills for the betterment of the organization. Being Software Test Engineer I want to enhance my proficiency in various software testing area and looking forward to work in a competitive environment that enhances my overall learnings.

---

## 📖 SUMMARY:

- Experience in Data driven Testing, Cross browser testing, Parallel Test execution, TestNG.
- Experienced on performing CRUD operation on APIs using POSTMAN tool.
- Worked on Automating Web Application using Selenium Hybrid Framework.
- Worked on Test framework Architecture.
- Worked on Projects following Agile Methodology.

- Experience in writing automation Test Scripts for regression testing using Framework.
- Experience in Requirement based Test scenario and test case review.
- Worked on Customizing Test report generation.
- Actively involved in writing Test data in Excel and automated by using Apache POI library.

---

## 🎓 EDUCATIONAL QUALIFICATION:

- **M.Tech:** Rvr&JC College of Engineering, Guntur
- **B.Tech:** Bapatla Engineering College, Bapatla

---

## 🔲 SKILLS:

**Languages** :   Java, Json, HTML

**Frameworks** : Hybrid Automation Framework

**Tools** : API Postman, Maven, Selenium, Rest web services, TestNG

**Integration tools**: Jenkins

**Defect Management Tool**: JIRA

**Versioning tool**: GitHub

---

## 📖 EXPERIENCE:

**ROLE:**
Automation test engineer

- Test Script development
- executing scripts in Jenkins
- performing Batch Execution, Group Execution, Parallel execution, and Cross-Browser execution
- API testing
- creation of maven profiling and parameter and maven build life cycle

**Project 1:** SPAZIO
SPAZIO is an application that provides end to end business integration solution to clients. It offers an uninterrupted continuous Business integration to assist the business users to maintain, monitor and control everyday business activities.
Managing the relationship with a customer is one of the most important concerns of any business, no matter its size. The better the relationship with the customer, the more they buy. Today, many businesses manage their customer relationships through the use of software designed specifically to track the contact between customer, business teams, and brand itself.

**ROLE:**
Automation test engineer

- Test Script development
- creating POM class and add elements if required and involved in creating business library
- identifying and prioritizing the Test Cases to be automated
- implementing Test script by using TestNg.
.

**Project 2:** LADOGA
LADOGA is used to track business resources (such as raw materials, and production capacity) and the status of commitments made by the business (such as customer orders, purchase orders, and employee payroll), no matter which department (manufacturing, purchasing, sales, accounting, and so on) has entered the data into the system.
Astro facilitates information flow between all business functions inside the organization and manages connections to outside stakeholders

## 📖 RECOGNITIONS :

**IBM -** Building AI Powered chat bots without programming
